SERVICE-LEARNING

Kranitz Student Center, KSC-151A
Phone: (602) 787-6657
Website: www.pvc.maricopa.edu/~servlearn

Service-Learning is a direct expression of the PVCC vision statement. Our college is dedicated to "building partnerships.... that cross institutional boundaries for innovative instruction and coordinated community service."

What is Service-Learning? Service-Learning combines academic learning and educational goals with student action in real life situations outside the four walls of the classroom. Students are given the opportunity to learn and develop as leaders through active participation in thoughtfully organized service experiences that meet vital community needs. The opportunities are coordinated in collaboration with the school and community site. With a smooth integration in the student's academic curriculum, it provides structured time for a student to think, talk, and write about what he/she experiences during the service activity. That in turn allows students the chance to see knowledge acting upon real situations in their own communities. This further enhances what is taught in the classroom by extending learning beyond the school building. Service-Learning helps to foster the development of sense of caring for others, hopefully resulting in a lifetime of community involvement and awareness.

Reasons to do Service-Learning:

- * Hands-on learning
- * Make a Difference
- * Network
- * Communicate
- * Strengthen your resume
- * Apply your learning to real-world experiences

Services:

- * Community Service
- * Volunteerism
