**New Account Setup**

In order to receive messages, you first need to set up a Mail or Newsgroup account.

This Wizard will collect the information necessary to set up a Mail or Newsgroup account. If you do not know the information requested, please contact your System Administrator or Internet Service Provider.

Select the type of account you would like to set up:

Email account  
 .Mac  
 RSS News & Blogs

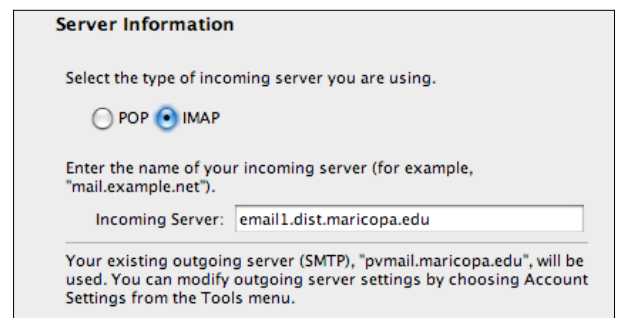

Enter the name you would like to appear in the "From" field of your outgoing messages (for example, "John Smith").

Your Name:

Enter your email address. This is the address others will use to send email to you (for example, "user@example.net").

Email Address:

**Server Information**

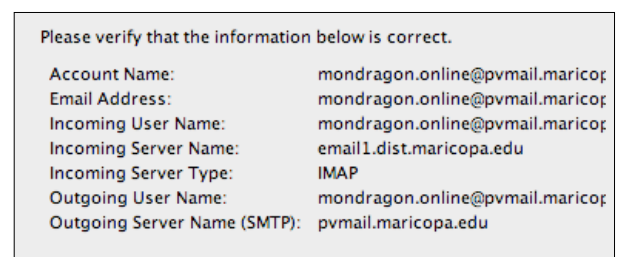

Select the type of incoming server you are using.

POP  IMAP

Enter the name of your incoming server (for example, "mail.example.net").

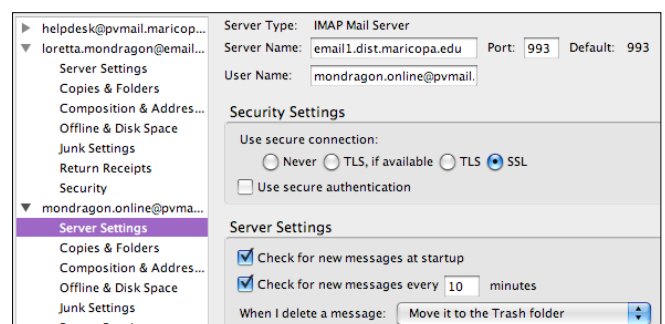

Incoming Server:

Your existing outgoing server (SMTP), "pvmail.maricopa.edu", will be used. You can modify outgoing server settings by choosing Account Settings from the Tools menu.

Please verify that the information below is correct.

Account Name:	mondragon.online@pvmail.maricop;
Email Address:	mondragon.online@pvmail.maricop;
